

EGR100

Monitoring station IP receiver

Up to 65 000
objects

Operating
systems:
XP/Vista/7

Free download
and support

Supports
ELDES
control
panels

What is it and what it does?

IP Receiver Software EGR100, receives information from Eldes control panels via GPRS and converts it to the popular MLR2-DG format used by third party monitoring stations.

EGR100 creates a virtual COM port, collects data from the [alarm control panels](#) and forwards it to monitoring station software.
