# Wired LED keypad EKB3 for ELDES control panels

EKB3 allows GSM panel configuration via comfortable and flat push-buttons

Enter and change passwords

Input administrative commands

Integrated sound signaler

Countdown time signaler

## What is EKB3?

EKB3 is a LED keypad. Attractive design meets convenience. It is compatible with ELDES alarm and control systems.

## What is EKB3 keypad for?

EKB3 allows GSM panel configuration via comfortable and flat push-buttons.

EKB3 is compatible with panels ESIM264, ESIM364 and ESIM384.

The keyboard uses two password levels – user and administrator. System configuration can be performed by entering administrator password and using programming commands.

Integrated sound signaler informs about successful/unsuccessful functions performance, informs about entry and delay time countdowns.
