

# Ethernet communicator ELAN3-ALARM

ELAN3-ALARM device is an Ethernet-based communicator that enables instant Internet access allowing to establish a communication between [ESIM364](#) or [ET082](#) and [EGR100](#)

Kronos, SIA IP, ELDES protocols

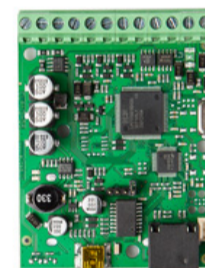

10/100 Mbit  
Ethernet port

Dimensions:  
63x82x17 mm

Power supply: 10-24V  
DC, 210mA

## What is it?

ELAN3-ALARM is an Ethernet-based communicator that enables instant Internet access, allowing to establish a communication between [ESIM364](#) or [ET082](#) and [EGR100](#), Kronos IP, SIA IP protocol-based monitoring station software.

## What it does?

The product can be used to connect [ESIM364](#) to Eldes Smart Security platform.

Ethernet communicator enables remote configuration of [ESIM364](#) and [ET082](#).

ELAN3-ALARM suits where GSM/GPRS connection is weak, it also works as additional backup connection.

## Main features

Supported Ethernet connectivity: 10/100 Mbit

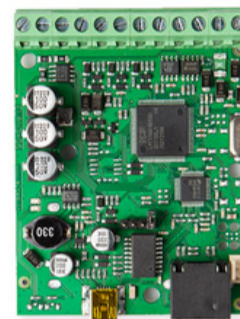

Automated configuration

Enables Internet access on ESIM364/ET082 via

Ethernet interface

## Specifications

Power supply	10-24V 50Hz ~ 210mA max. / 10-24V 210mA max.
Supported Ethernet connectivity	10/100 Mbit
Humidity	0-90% RH @ 0... +40 °C (non-condensing)
Operating temperature range	range-20...+55 °C
Dimensions	63×82×17 mm
