What is EWK2?

EWK2 is a wireless device intended to remotely arm and disarm ELDES alarm system or to control any electric appliance connected to the alarm system's PGM output.

What EWK2 does?

EWK2 keyfob features sleek design and four configurable buttons intended to operate according to individual needs.

After the button is pressed, EWK2 internal buzzer's sound signal and red LED indicator confirms a transferred command to ELDES alarm system via wireless connection.

Depending on Eldes control panel it is allowed to connect up to 32 keyfobs.
